- › Creating pixel perfect UIs
- › **Additional** MATLAB, Python, Mathematica, OAuth, Ruby, Rails, MongoDB, D3.js, SEO, Photoshop

summary

- › Technically skilled & design-minded full stack web developer
- › B.S. in Materials Science & Engineering from MIT
- › Established & grew manufacturing company

experience & education

Full Stack Web Development

Oct 2015 – Present

Galvanize

San Francisco, CA

Immersive 24 week software development program. Built robust single page apps with modern MVC frameworks.

Cofounder & Technical Lead

April 2009 – Oct 2015

Sedona Stone Veneer

Phoenix, AZ

Established stone veneer manufacturing company. Built website with extensive use of Javascript, jQuery, PHP, HTML, CSS and Photoshop. Formulated and developed 3 product lines. Sourced raw materials from US, Mexico & China. Set up 10k sq. ft. production facility and 1.5 acre stock yard in Mesa, AZ. Established efficient production workflow for 8 employees. Grew sales from \$0 to \$45k+ per month.

Cofounder

July 2007 – March 2009

Rezver

Chandler, AZ

Translated MIT Biotechnology lab research into market ready supplements. Set up pilot production facility outside of Vancouver, BC. Extensive quality control testing.

B.S. Materials Science & Engineering Massachusetts Institute of Technology

2003 – 2007

Cambridge, MA

Managed complex and ambiguous research projects in bioengineering labs.

Authored Matlab and Python scripts for automation of data collection and analysis, saving peer researchers several hundred hours of work.
